-!- FUNCTION: INSULIN DECREASES BLOOD GLOCOSE CONCENTRATION. IT INCREASES CELL PENNEABILITY TO MONOSACCHARIDES. AKINO ACIDS AND FATTY ACIDS. IT ACCELERATES GLYCOLYSIS, THE PENTOSE PHOSPHATE CYCLE, AND GLYCOGEN SYNTHESIS IN LIVER.
-!- SUBJUNIT: HETERODIMER OF A B CHAIN AND AN A CHAIN LINKED BY TWO DISULFIDE BOUSS.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Crycholaqus cuniculus (Rabbit).

Sainris sciureus (Common squirrel monkey).
Eukaryota: Metazoa: Charordata: Craniata: Verlebrata: Buteleostomi:
Mammalia; Eutheria: Primates; Platyrrhini; Cebidae; Aotinae; Aotus.
FUNCTION: 115-152(1972).

-!- FUNCTION: INSULIN DECREASES BLOCD GLUCOSE CONCENTRATION. IT INCREASES CELL PERMENBILITY TO MONOSACCHARIDES, AMINO ACLDS ANI FATTY ACIDS. IT ACCELERATES GAYCOLYSIS, THE PENTICSE PHOSPHATE CYCLE. AND GLYCOGEN SYNTHESIS IN LIVER.

-!- SUCCEST AND GLYCOGEN SYNTHESIS IN LIVER.

-!- SUCCESTED BONDS.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         MEDLINE=88041119; PubMed-3118367;
